

Abdelhak Ajbouni Frontend TypeScript Developer

✉ abdelhak.ajbouni@gmail.com ☎ +352661287509 🔗 abdelhak-ajbouni.com 📍 Luxembourg

👤 Profile

Frontend Developer with 8 years of experience building data-driven applications. I've worked across diverse environments, from fast-paced startups to large financial institutions.

🧠 Skills

Typescript - ReactJS - NextJS - ReactNative - NodeJS - Vitest

👜 Professional Experience

Frontend Consultant

European Investment Bank (EIB) 🔗

03/2023 – present
Luxembourg, Luxembourg

- Maintained an internal tool for monitoring contracts and cashflows.
- Migrated legacy code from Javascript to Typescript while incorporating modern tools like React Query and Orval.
- Worked closely with back-end developers to integrate front-end components with server-side logic.
- Wrote high-coverage unit and integration tests with Vitest and RTL.

Full Stack Developer

Groupado

10/2020 – 10/2022 | Tunis, Tunisia

- Built an SSO authentication service that permits users to use one set of login credentials across all Groupado projects using Keycloak and gRPC.
- Helped create a payment gateway that utilizes users' location to show different payment methods (Paypal, Checkout.com, Fawry ...) while giving insight through an admin dashboard, using Expressjs, Postgres, and Nextjs.
- Created a Tags management service with Neo4j as a database, Redis for cache, and Elastic for fuzzy search.
- Worked closely with the DevOps team to migrate from PM2 to Kubernetes and use AWS services like S3, Cloudfront, and RDS.
- Reviewed code for junior developers and assisted interns with their projects.

Full Stack Developer

Target Energy Solutions

03/2020 – 09/2020 | Tunis, Tunisia

- Built microservices with Nodejs, Expressjs, and MongoDB.
- Improved apps architecture by turning mutual features and functionalities into microservices.
- Created gRPC endpoints to communicate between services efficiently.
- Introduced a local development environment with docker and docker-compose.

Frontend Developer

Target Energy Solutions

07/2018 – 03/2020 | Tunis, Tunisia

- Collaborated with an international team on large-scale applications for data-driven industries and Provided digital transformation solutions for clients as big as Petroleum Development Oman.
- Created reusable and generic components using React, Redux, and SASS.
- Consumed GraphQL, gRPC, and REST APIs.
- Optimized components for maximum performance across different browsers.
- Worked effectively with members from different departments during all stages of application development.

Frontend Developer

Medianet

10/2017 – 06/2018 | Ariana, Tunisia

- Produced a range of projects, designing appealing websites and interacting daily with graphic designers, back-end developers, and marketers.
examples: djerbaplaza.com - saveursdusahara.com - dareljeld.com
- Integrated mobile-first websites using HTML, SASS, and jQuery.
- Ensuring SEO-friendly structure.
- Optimizing websites for maximum speed using Gulp.

Frontend Intern

Techpoint

01/2017 – 06/2017 | Mutuelleville, Tunisia

- Helped build a Real estate website using WordPress and Bootstrap.
- Developed and maintained the frontend functionalities of the website.
- Participated in discussions with clients to clarify features.

Education

Bachelor's degree in Computer Information Systems
ISSATM

2017 | Tunis, Tunisia

Projects

Veymo.io

Tool for animating images with AI

This project uses NextJS with Convex to generate videos from images, Clerk for auth, Stripe for billing, and Resend for notifications.

Veymo Photoshoot

Android app for generating products photoshoots

An app with Expo, Convex, and Replicate that uses Seedream to create professional photoshoot images for any product.

AskQuran

Ai agent that answers question from the Quran

A ChatGPT wrapper with Retrieval-Augmented Generation to add Quran as context for the LLM.
